Subject Index

Volume 93, July 11–December 12/26, 2003

A

ABCA1

Novel Polypyrimidine Variation (IVS46: del T -39...-46) in *ABCA1* Causes Exon Skipping and Contributes to HDL Cholesterol Deficiency in a Family With Premature Coronary Disease, 1006

Ablation

Site of Origin and Molecular Substrate of Atrioventricular Junctional Rhythm in the Rabbit Heart, 1102

ACE inhibitors

Do Studies With ACE N- and C-Domain Selective Inhibitors Provide Evidence for a Non-ACE, Non-Chymase Angiotensin II-Forming Pathway?, 91

Acetylcholine

Rapid Effect of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibition on Coronary Endothelial Function, e98

AcSDKP

Do Studies With ACE N- and C-Domain Selective Inhibitors Provide Evidence for a Non-ACE, Non-Chymase Angiotensin II-Forming Pathway?, 91

Actin

Modulation of Thin Filament Activation by Breakdown or Isoform Switching of Thin Filament Proteins: Physiological and Pathological Implications, 1170

Actin cytoskeleton

G Protein $\beta\gamma$ Subunits Stimulate p114RhoGEF, a Guanine Nucleotide Exchange Factor for RhoA and Rac1: Regulation of Cell Shape and Reactive Oxygen Species Production, 848

Action potentials

Electrophysiological Profiling of Cardiomyocytes in Embryonic Bodies Derived From Human Embryonic Stem Cells: Therapeutic Implications, 1

Human Embryonic Stem Cells Develop Into Multiple Types of Cardiac Myocytes: Action Potential Characterization, 32

Regulation of Connexin43 Gap Junctional Conductance by Ventricular Action Potentials, e63

Transmural Electrophysiological Heterogeneities Underlying Arrhythmogenesis in Heart Failure, 638

Activin receptor-like kinase 1

Arterial Endothelium-Specific Activin Receptor-Like Kinase 1 Expression Suggests Its Role in Arterialization and Vascular Remodeling, 682

Actomyosin

Creatine Phosphate Consumption and the Actomyosin Crossbridge Cycle in Cardiac Muscles, 54

Adenosine

Activation of Adenosine A_1 Receptor Attenuates Cardiac Hypertrophy and Prevents Heart Failure in Murine Left Ventricular Pressure-Overload Model, 759

Adenosine receptors

Reduction in Preretinal Neovascularization by Ribozymes That Cleave the A_{2B} Adenosine Receptor mRNA, 500

Adenoviral gene transfer

Effects of Adenovirus-Mediated Sorcin Overexpression on Excitation-Contraction Coupling in Isolated Rabbit Cardiomyocytes, 132

Adenylyl cyclase isoforms

Type 5 Adenylyl Cyclase Disruption Alters Not Only Sympathetic But Also Parasympathetic and Calcium-Mediated Cardiac Regulation, 364

Adipogenesis

Paracrine Regulation of Angiogenesis and Adipocyte Differentiation During In Vivo Adipogenesis, e88

β -Adrenergic receptors

Type 5 Adenylyl Cyclase Disruption Alters Not Only Sympathetic But Also Parasympathetic and Calcium-Mediated Cardiac Regulation, 364

What Is the Role of β -Adrenergic Signaling in Heart Failure?, 896

AE3

Influence of Na^+ -Independent Cl^- - HCO_3^- Exchange on the Slow Force Response to Myocardial Stretch, 1082

Aging

Senescence and Death of Primitive Cells and Myocytes Lead to Premature Cardiac Aging and Heart Failure, 604

Akt

Akt Controls Vascular Smooth Muscle Cell Proliferation In Vitro and In Vivo by Delaying G1/S Exit, 1059

All in the Family: VEGF-B Joins the Ranks of Proangiogenic Cytokines, 87

Albumin extravasation

Endothelin B Receptor Deficiency Predisposes to Pulmonary Edema Formation via Increased Lung Vascular Endothelial Cell Growth Factor Expression, 456

Aldosterone

Aldosteronism and Peripheral Blood Mononuclear Cell Activation: A Neuroendocrine-Immune Interface, e124

Alternative splicing

Alternative Splicing of cGMP-Dependent Protein Kinase I in Angiotensin-Hypertension: Novel Mechanism for Nitrate Tolerance in Vascular Smooth Muscle, 805

Alveolization

Circulating Vascular Progenitor Cells Do Not Contribute to Compensatory Lung Growth, 372

Amphiregulin

Betacellulin and Amphiregulin Induce Upregulation of Cyclin D1 and DNA Synthesis Activity Through Differential Signaling Pathways in Vascular Smooth Muscle Cells, 302

Angiogenesis

All in the Family: VEGF-B Joins the Ranks of Proangiogenic Cytokines, 87

Angiotensin II Type 2 Receptor Inhibits Vascular Endothelial Growth Factor-Induced Migration and In Vitro Tube Formation of Human Endothelial Cells, 438

Arterial Endothelium-Specific Activin Receptor-Like Kinase 1 Expression Suggests Its Role in Arterialization and Vascular Remodeling, 682

Cell Type-Specific Regulation of Angiogenic Growth Factor Gene Expression and Induction of Angiogenesis in Nonischemic Tissue by a Constitutively Active Form of Hypoxia-Inducible Factor 1, 1074

Diverse Origin and Function of Cells With Endothelial Phenotype Obtained From Adult Human Blood, 1023

Hypoxia-Inducible Factor-1 Mediates Activation of Cultured Vascular Endothelial Cells by Inducing Multiple Angiogenic Factors, 664

Migration Inhibitory Factor Mediates Angiogenesis via Mitogen-Activated Protein Kinase and Phosphatidylinositol Kinase, 321

Myoendothelial Differentiation of Human Umbilical Cord Blood-Derived Stem Cells in Ischemic Limb Tissues, e51

Paracrine Regulation of Angiogenesis and Adipocyte Differentiation During In Vivo Adipogenesis, e88

Vascular Endothelial Growth Factor-B Promotes In Vivo Angiogenesis, 114

Angiography

Rapid Effect of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Inhibition on Coronary Endothelial Function, e98

Angioplasty

Bone Marrow Monocyte Lineage Cells Adhere on Injured Endothelium in a Monocyte Chemoattractant Protein-1-Dependent Manner and Accelerate Reendothelialization as Endothelial Progenitor Cells, 980

Tumor Necrosis Factor-Mediated E2F1 Suppression in Endothelial Cells: Differential Requirement of c-Jun N-Terminal Kinase and p38 Mitogen-Activated Protein Kinase Signal Transduction Pathways, 932

Angiopoietins

Hypoxia-Inducible Factor-1 Mediates Activation of Cultured Vascular Endothelial Cells by Inducing Multiple Angiogenic Factors, 664

Angiotensin

Contrasting Roles of NADPH Oxidase Isoforms in Pressure-Overload Versus Angiotensin II-Induced Cardiac Hypertrophy, 802

- Extracellular Superoxide Dismutase Is a Major Determinant of Nitric Oxide Bioavailability: In Vivo and Ex Vivo Evidence From ecSOD-Deficient Mice, 622
- Roles of the Two Active Sites of Somatic Angiotensin-Converting Enzyme in the Cleavage of Angiotensin I and Bradykinin: Insights From Selective Inhibitors, 148
- Angiotensin II**
- Alternative Splicing of cGMP-Dependent Protein Kinase I in Angiotensin-Hypertension: Novel Mechanism for Nitrate Tolerance in Vascular Smooth Muscle, 805
 - Angiotensin II Signaling Pathways Mediate Expression of Cardiac T-Type Calcium Channels, 1241
 - Angiotensin II Type 2 Receptor Inhibits Vascular Endothelial Growth Factor-Induced Migration and In Vitro Tube Formation of Human Endothelial Cells, 438
 - AT1b Receptor Predominantly Mediates Contractions in Major Mouse Blood Vessels, 1089
 - Cellular Mechanism of Vasoconstriction Induced by Angiotensin II: It Remains To Be Determined, 1015
 - Do Studies With ACE N- and C-Domain Selective Inhibitors Provide Evidence for a Non-ACE, Non-Chymase Angiotensin II-Forming Pathway?, 91
 - Long-Term Inhibition of Rho-Kinase Suppresses Angiotensin II-Induced Cardiovascular Hypertrophy in Rats In Vivo: Effect on Endothelial NAD(P)H Oxidase System, 767
 - Mnk1 Is Required for Angiotensin II-Induced Protein Synthesis in Vascular Smooth Muscle Cells, 1218
- Angiotensin-converting enzyme**
- Do Studies With ACE N- and C-Domain Selective Inhibitors Provide Evidence for a Non-ACE, Non-Chymase Angiotensin II-Forming Pathway?, 91
 - Roles of the Two Active Sites of Somatic Angiotensin-Converting Enzyme in the Cleavage of Angiotensin I and Bradykinin: Insights From Selective Inhibitors, 148
- Anionic phospholipids**
- Do Anionic Phospholipids Serve as Cofactors or Second Messengers for the Regulation of Activity of Cloned ATP-Sensitive K^+ Channels?, 646
- Antiarrhythmic drugs**
- Antiarrhythmic Drug Target Choices and Screening, 491
 - Pharmacological Activation of Normal and Arrhythmia-Associated Mutant KCNQ1 Potassium Channels, 941
- Antioxidants**
- Thioredoxin: A Key Regulator of Cardiovascular Homeostasis, 1029
- Antithrombin deficiency**
- Life-Threatening Thrombosis in Mice With Targeted Arg48-to-Cys Mutation of the Heparin-Binding Domain of Antithrombin, 1120
- AP-1**
- AP-1 Is Involved in UTP-Induced Osteopontin Expression in Arterial Smooth Muscle Cells, 674
- Apoptosis**
- Engineering the Response to Vascular Injury: Divergent Effects of Deregulated E2F1 Expression on Vascular Smooth Muscle Cells and Endothelial Cells Result in Endothelial Recovery and Inhibition of Neointimal Growth, 162
 - Fas and Fas-Associated Death Domain Protein Regulate Monocyte Chemoattractant Protein-1 Expression by Human Smooth Muscle Cells Through Caspase- and Calpain-Dependent Release of Interleukin-1 α , 515
 - ICER-Capades: Putting Cardiac Cyclic AMP Signaling "On Ice", 6
 - Inducible cAMP Early Repressor (ICER) Is a Negative-Feedback Regulator of Cardiac Hypertrophy and an Important Mediator of Cardiac Myocyte Apoptosis in Response to β -Adrenergic Receptor Stimulation, 12
 - NHE-1 and NHE-6 Activities: Ischemic and Reperfusion Injury, 694

Regulation of Gene Expression by Cyclic GMP, 1034

Trimetazidine

Beneficial Effects of Trimetazidine in Ex Vivo Working Ischemic Hearts Are Due to a Stimulation of Glucose Oxidation Secondary to Inhibition of Long-Chain 3-Ketoacyl Coenzyme A Thiolase, e33

The Antianginal Agent Trimetazidine Does Not Exert Its Functional Benefit via Inhibition of Mitochondrial Long-Chain 3-Ketoacyl Coenzyme A Thiolase, e26

Tropomyosin

Modulation of Thin Filament Activation by Breakdown or Isoform Switching of Thin Filament Proteins: Physiological and Pathological Implications, 1170

Troponin

C-Terminal Truncation of Cardiac Troponin I Causes Divergent Effects on ATPase and Force: Implications for the Pathophysiology of Myocardial Stunning, 917

Modulation of Thin Filament Activation by Breakdown or Isoform Switching of Thin Filament Proteins: Physiological and Pathological Implications, 1170

TRPV2

TRPV2 Is a Component of Osmotically Sensitive Cation Channels in Murine Aortic Myocytes, 829

Tumor necrosis factor- α

Engineering the Response to Vascular Injury: Divergent Effects of Deregulated E2F1 Expression on Vascular Smooth Muscle Cells and Endothelial Cells Result in Endothelial Recovery and Inhibition of Neointimal Growth, 162

Two-pore domain K channel

Two-Pore Domain K Channel, TASK-1, in Pulmonary Artery Smooth Muscle Cells, 957

U**Unstable angina**

De Novo Expression of Killer Immunoglobulin-Like Receptors and Signaling Proteins Regulates the Cytotoxic Function of CD4 T Cells in Acute Coronary Syndromes, 106

Urotensin

Direct Actions of Urotensin II on the Heart: Implications for Cardiac Fibrosis and Hypertrophy, 246

V**Vagal activity**

Respiratory Sinus Arrhythmia: Endogenous Activation of Nicotinic Receptors Mediates Respiratory Modulation of Brainstem Cardiorespiratory Parasympathetic Neurons, 565

Vanilloid receptor

TRPV2 Is a Component of Osmotically Sensitive Cation Channels in Murine Aortic Myocytes, 829

Vascular biology

The Evolution of the Discipline of Vascular Biology: From Systems Physiology to Molecular Biology to Molecular Systems, 583

Vascular cells

Specific Contribution of Estrogen Receptors on Mitogen-Activated Protein Kinase Pathways and Vascular Cell Activation, 399

Vascular disease

Glycation, Inflammation, and RAGE: A Scaffold for the Macrovascular Complications of Diabetes and Beyond, 1159

Vascular endothelial growth factor

Hypoxia-Inducible Factor-1 Mediates Activation of Cultured Vascular Endothelial Cells by Inducing Multiple Angiogenic Factors, 664
Ligand-Independent Activation of Vascular Endothelial Growth Factor Receptor 2 by Fluid Shear Stress Regulates Activation of Endothelial Nitric Oxide Synthase, 354

Paracrine Regulation of Angiogenesis and Adipocyte Differentiation During In Vivo Adipogenesis, e88

Vascular endothelial growth factor receptor-1

All in the Family: VEGF-B Joins the Ranks of Proangiogenic Cytokines, 87

Vascular endothelial growth factor-B

All in the Family: VEGF-B Joins the Ranks of Proangiogenic Cytokines, 87

Vascular Endothelial Growth Factor-B Promotes In Vivo Angiogenesis, 114

Vascular endothelium

Circulating Vascular Progenitor Cells Do Not Contribute to Compensatory Lung Growth, 372

Vascular estrogen receptors

Hormonal Regulation of Normal Vascular Tone in Males, 1142

Vascular gene expression

Aorta of ApoE-Deficient Mice Responds to Atherogenic Stimuli by a Prelesional Increase and Subsequent Decrease in the Expression of Antioxidant Enzymes, 262

Vascular permeability

Endothelin B Receptor Deficiency Predisposes to Pulmonary Edema Formation via Increased Lung Vascular Endothelial Cell Growth Factor Expression, 456

Vascular remodeling

Arterial Endothelium-Specific Activin Receptor-Like Kinase I Expression Suggests Its Role in Arterialization and Vascular Remodeling, 682

Pressure-Induced Vascular Activation of Nuclear Factor- κ B: Role in Cell Survival, 207

Vascular smooth muscle

Alternative Splicing of cGMP-Dependent Protein Kinase I in Angiotensin-Hypertension: Novel Mechanism for Nitrate Tolerance in Vascular Smooth Muscle, 805

Circulating Vascular Progenitor Cells Do Not Contribute to Compensatory Lung Growth, 372

Regulation of the Growth Arrest and DNA Damage-Inducible Gene 45 (GADD45) by Peroxisome Proliferator-Activated Receptor γ in Vascular Smooth Muscle Cells, e38

The BK Channel: Protective or Detrimental in Genetic Hypertension?, 893

TRPV2 Is a Component of Osmotically Sensitive Cation Channels in Murine Aortic Myocytes, 829

Vascular smooth muscle cells

Engineering the Response to Vascular Injury: Divergent Effects of Deregulated E2F1 Expression on Vascular Smooth Muscle Cells and Endothelial Cells Result in Endothelial Recovery and Inhibition of Neointimal Growth, 162

- Mnk1 Is Required for Angiotensin II-Induced Protein Synthesis in Vascular Smooth Muscle Cells, 1218
- Vascular tone**
- Altered Expression of Small-Conductance Ca^{2+} -Activated K^+ (SK3) Channels Modulates Arterial Tone and Blood Pressure, 124
- Vasoconstriction**
- AT1b Receptor Predominantly Mediates Contractions in Major Mouse Blood Vessels, 1089
- Cellular Mechanism of Vasoconstriction Induced by Angiotensin II: It Remains To Be Determined, 1015
- Vasodilation**
- Does Nitric Oxide Mediate the Vasodilator Activity of Nitroglycerin?, e104
- Ligand-Independent Activation of Vascular Endothelial Growth Factor Receptor 2 by Fluid Shear Stress Regulates Activation of Endothelial Nitric Oxide Synthase, 354
- VEGFR-1**
- All in the Family: VEGF-B Joins the Ranks of Proangiogenic Cytokines, 87
- Vein grafts**
- Circulating Progenitor Cells Regenerate Endothelium of Vein Graft Atherosclerosis, Which Is Diminished in ApoE-Deficient Mice, e76
- Ventricle**
- Neuropeptide Y Is an Essential In Vivo Developmental Regulator of Cardiac $I_{\text{Ca,L}}$, 972
- Neuropeptide Y Modulates L-Type Ca^{2+} Current During Heart Development, 891
- Ventricular arrhythmias**
- Very-Long-Chain Acyl-Coenzyme A Dehydrogenase Deficiency in Mice, 448
- Ventricular pacing**
- Cardiac Memory Is Associated With Decreased Levels of the Transcriptional Factor CREB Modulated by Angiotensin II and Calcium, 472
- Ventricular tachycardia**
- Not All Sudden Death Is the Same, 484
- Ryanodine Receptor Mutations Associated With Stress-Induced Ventricular Tachycardia Mediate Increased Calcium Release in Stimulated Cardiomyocytes, 531
- von Willebrand factor**
- $\text{Ca}_v3.1$ (α_{1G}) T-Type Ca^{2+} Channels Mediate Vaso-Occlusion of Sickled Erythrocytes in Lung Microcirculation, 346
